

Employment
Opportunity for:

Geographic Information Systems Specialist

GIS
Specialist

The Washington State Department of Revenue has one position open for a Geographic Information Systems Specialist.

LOCATION:

The position is located in beautiful Olympia, Washington. Olympia, the state's capitol, is located on the southern tip of Puget Sound approximately one hour from Seattle. Mount Rainier and the rugged Cascade Mountains are nearby to the east. Olympic National Park and Washington's Pacific Ocean coast are both just an hour away.

AGENCY PROFILE:

The Department of Revenue's mission is to fairly and efficiently collect revenues and administer programs to fund public services, advocate sound tax policy, and continuously improve the quality of service.

The Department employs 1,000 people in classifications ranging from property tax appraisers, revenue agents and revenue auditors, to foresters, computer systems analysts and excise tax examiners. The headquarters of the organization is located in Olympia, Washington. There are also 15 field offices geographically located throughout the state. The Department also employs several auditors in out-of-state locations.

INFORMATION SERVICES DIVISION:

The Department of Revenue Information Services Division strives to be a leader in innovation for state government. The division's primary mission is to provide information technology services, which support and enable the successful completion of agency and divisional operational objectives. Information Services also utilizes information technologies to identify, enable, and implement business solutions that deliver significant value to our internal and external customers.

POSITION RESPONSIBILITIES:

We're seeking a skilled, customer-focused cartographer for the creation and production of electronic mapping products using GIS. Responsibilities include text editing, and electronic format conversions as well as QC checks. The successful candidate will be deadline-oriented and able to function in a team environment with excellent communication, interpersonal, decision-making, and problem-solving skills. The position requires a bachelor's degree in cartography, GIS, geography, or similar field and knowledge of cartographic production techniques is preferred. Experience with computer operating systems and cartographic software is essential. Must be able to read maps and master the use of GIS software tools.

COMPENSATION:

Washington State offers a generous, competitive benefit package including vacation and sick leave, health, dental and life insurance, retirement, and an optional deferred compensation program. Salary dependent upon qualifications and experience.
